SUMMARY

Offensive security engineer with 1.11 years of hands-on VAPT experience across web, API, network, mobile (Android), and AI/LLM-integrated applications. eJPT certified, and an active CTF player, with a strong foundation in vulnerability assessment and Linux.

SKILLS

- **Programming:** Python (Intermediate) & Bash (Beginner).
- **Penetration Testing:** Web/API Application, Network, Android (Mobile), and AI/LLM-Integrated Web Application Security.
- **Core Skills:** Vulnerability Assessment & Management, Digital Forensics, Linux, Low-Level Networking.
- **Tools:** Burp Suite, Postman, Nmap, Nuclei, Sqlmap, Metasploit, Jadx, Apktool, MobSF, HCL AppScan etc.

WORK EXPERIENCE

Assistant System Engineer || Tata Consultancy Services (India) **Oct 2024 - Present**

Penetration testing engineer performing web, API, Android, and AI/LLM application security assessments in simulated attack scenarios:

- Conduct web application and infrastructure penetration tests on internal and client-facing systems to identify security weaknesses.
- Perform reconnaissance, vulnerability scanning, and exploitation using Burp Suite, HCL AppScan, Nmap, and Metasploit.
- Identify and validate vulnerabilities such as XSS, SQL Injection, CSRF, and IDOR across internal and client-facing applications.
- Perform API security testing on REST/SOAP endpoints, identifying broken authentication, IDOR, excessive data exposure, and rate-limiting flaws using Burp Suite and Postman.
- Assess Android applications through static and dynamic analysis using Jadx, Apktool, and MobSF, uncovering insecure data storage, hardcoded API keys, and weak SSL pinning implementations.
- Evaluate AI/LLM-integrated web features for prompt injection, insecure output handling, and excessive agency risks, aligning findings with OWASP LLM Top 10.
- Document findings, exploitation steps, and remediation guidance in detailed assessment reports.

Cyber Forensic intern(Remote) || Cyber Secured India **Apr 2023 - Jun 2023**

As a Digital Forensics Intern, I gained foundational knowledge in digital forensics and utilized basic tools, including:

- Digital evidence collection and preservation.
- Forensic software such as EnCase, Volatility, FTK imager, and Autopsy for data recovery.

CERTIFICATIONS

- **eJPT** – eLearnSecurity Junior Penetration Tester. [Link](#)

EDUCATION

2021-2024 B. Sc in IT (**Cyber Security**) at **Maulana Abul Kalam Azad University of Technology**
(CGPA: 7.99)

ACHIEVEMENTS

Actively participate in Capture The Flag (CTF) competitions. Key highlights:

- Top 100 Finalist – **TCS HackQuest (Season 8)**
- Ranked 60th in DEFCON CTF (**Bug Bounty Village track**), competing against a global field of security researchers
- Took part in a live ctf named **HacksCTF**. [Link](#)
