SUMMARY

Cybersecurity graduate with hands-on experience in penetration testing, offensive security, and web application security. Active CTF player with a strong foundation in Linux hardening, digital forensics, and vulnerability assessment.

SKILLS

- **Programming:** Python (Intermediate) & Bash (Beginner).
- **Core Skills:** Web Application Security, Network Security, Digital Forensics, Cryptography Concepts, Linux, Low-Level Networking.
- **Tools:** NMAP, Metasploit, Burp Suite, IBM AppScan and more.

WORK EXPERIENCE

Assistant System Engineer || Tata Consultancy Services (India) **Oct 2024 - Present**

As a Red Team Security Engineer (Assistant System Engineer), I developed practical skills in offensive security and demonstrated proficiency in tools and techniques used in simulated attack scenarios, including:

- Performing web application and infrastructure penetration testing to identify security weaknesses.
- Utilizing tools such as Burp Suite, IBM AppScan, Nmap, and Metasploit for reconnaissance, vulnerability scanning, and exploitation.
- Identifying common vulnerabilities such as XSS, SQL Injection, CSRF, and IDOR in internal and client-facing applications.
- Assisting in the creation of detailed reports outlining findings, exploitation steps, and remediation recommendations.

Cyber Forensic intern(Remote) || Cyber Secured India **Apr 2023 - Jun 2023**

As a Digital Forensics Intern, I gained foundational knowledge in digital forensics and utilized basic tools, including:

- Digital evidence collection and preservation.
- Forensic software such as EnCase, Volatility, FTK imager, and Autopsy for data recovery.

PROJECTS

All of my projects can be found on my **GitHub**. [{Link}](#)

A few significant ones are:

- Mac Changer – Developed a Python script to spoof MAC addresses for Red Team simulations.
- Cipher Cracker – Created a Caesar/Shift cipher decoder to automate decryption for CTF challenges.

CERTIFICATIONS

- **Pursuing:** eJPT (eLearnSecurity Junior Penetration Tester)
- Learn Ethical Hacking From scratch [{Link}](#)
- Ethical Hacking [{Link}](#)

EDUCATION

2021-2024 B. Sc in IT (**Cyber Security**) at **Maulana Abul Kalam Azad University of Technology**
(CGPA: 8.03)

2019-2021 Class 12th WBCHSE **Barajaguli Gopal Academy** (76.20%)

RESEARCH

I write about my research and experiments on my blog. [{Link}](#)

- I solve a lot of **HTB (Hack The Box)** and **TryHackMe** labs and write about them on my blog.

ACHIEVEMENTS

Actively participate in Capture The Flag (CTF) competitions. Key highlights:

- Top 100 Finalist – TCS HackQuest (Season 8)
- Took part in a live ctf named **HacksCTF**. [{Link}](#)
